1 Abstract

Kishka is a new and exciting cryptocurrency that has been designed for the crypto-savvy cat lovers around the world. This innovative currency aims to bring a fresh and entertaining perspective to the cryptocurrency space. Kishka will soon be available on Pulse-Chain, a novel cryptocurrency chain for tokens to be deployed on.

Kishka, which is currently only available to purchase on the Ethereum network will also be a token on the Pulse-Chain, which is a new and innovative blockchain network designed to be fast, secure, and efficient. Pulse-Chain is built on top of Ethereum, the world's leading blockchain network, and is designed to be fully compatible with Ethereum-based tokens. This compatibility ensures that Kishka will be able to work seamlessly with other Ethereum-based tokens, allowing for easy exchange and transfer between different cryptocurrencies.

The inspiration for Kishka's eponymous name is cryptocurrency HEX founder Richard Heart's personal cat that was adopted by his family as a child, signifying the unity between popular cat memes and cryptocurrency technology. The Kishka team will work to build a community around the token, offering incentives and rewards for those who invest in and support the currency. Kishka holders will be able to participate in exclusive events and promotions, as well as gain access to exclusive merchandise and content.

1 Abstract

The Kishka team is passionate about creating a fun and engaging cryptocurrency that cat lovers around the world can invest in and support. The team will work closely with the community to develop new and innovative ways to use Kishka, notably the flagship utility which will be unveiled as the token develops into Q2 2023, in addition to charity events and giveaways. Additionally, the team will work to ensure that the currency is secure and reliable, utilizing the latest blockchain technology to protect users' investments.

- In conclusion, Kishka is a new and exciting cryptocurrency that aims to bring a fresh and entertaining perspective to the crypto community. By combining the popularity of cat memes with the power of blockchain unity. By combining the popularity of cat memes with the power of blockchain technology, Kishka offers investors an innovative and enjoyable way to invest in the crypto market. The Kishka team is committed to building a strong community around the currency, providing incentives and rewards for those who invest in and support the token.

Values

TRANSPARENCY & COMMUNITY

Kishka is fully decentralized and supported by its community of enthusiasts. Free, open and frank communication is encouraged within the community supporters so that everyone willing can be informed and even participate in every step of Kishka growth! Multiple, independent, free group efforts in development, community self-management and more are strongly encouraged!

TRUST

In the cryptocurrency market, Trust is paramount. That means full transparency not only in the community support and development, but also in any security effort. Examples include pending top-grade audits of \$Kishka's code, and liquidity tokens being locked to eliminate any risk of malicious behaviour.

LONGEVITY

Kishka is in it for the long haul. The decentralized community is fostering long-term development of the token in preparation for the launch of Pulse-Chain which will result in real use cases, greater rewards and a popularity beyond any temporary trends

3

\$Kishka Token

\$Kishka is an ERC20 token which started on the Ethereum blockchain March 25, 2023. One of its core functionalities is its liquidity and marketing tax. For every user transaction, 4% of it is sent to liquidity, enabling greater stability of the price and resistance to sells as time goes on. In addition, 1% of each user transaction is sent to the publicly visible marketing wallet which will be used in a multitude of different ways to market \$Kishka.

KISHKA

4

Utility

A

\$Kishka will be launched on Pulse-Chain when it is deployed in 2023 and will unveil its flagship utility to become the first ERC-20 to Pulse-Chain bridge, enabling users to effortlessly move their \$Kishka cross-chain and providing a simple way for users to switch their \$Kishka for Pulse.

B

\$Kishka's Bridge is a lightweight node system that relies on the existing full nodes of supported blockchains. On each chain is what is known as a 'port' contract that all contracts interact with. The open aspect is that anyone will be able to call the port contracts, making it a public function/contract. The validators listen to events from these port contracts and relay the messages to the destination smart contract determined by the initial smart contract. It allows for easy cross-chain communication between smart contracts on EVM chains and non EVM chains.

C

The most pertinent issue when discussing the use of cross-chain bridges is accessibility. Developers that implement the bridge will not have to ask for any permission or sign up on any site. They can simply implement the code and test. With low fees and an easy to implement API, the bridge can become the go to source for easy cross-chain functionality.

D

The bridge also aims to allow cross-chain wallet management with non-EVM/ non-smart chains through the use of multiparty computation and threshold signatures. This will allow a smart contract to be able to generate ECDSA/EDDSA addresses (for example) and have control of that address through the use of the bridge validators.

E

\$Kishka's very own multi-chain decentralized exchange (DEX) is in the final stages of development and set to launch in Q2 2023. Users will be able to seamlessly buy, sell, and swap \$Kishka and other tokens that is primed to be the fastest and most highly customisable swap made to date.

5 Roadmap

1

Launch

- i. Initial Website Launch
- ii. Coingecko Listing
- iii. CoinMarketCap Listing

2

Utilities Release

- i. Website Redesign
- ii. \$Kishka Swap release (Decentralised Exchange)
- iii. CCryptocart Partnership

3

Pulse-Chain Release

- i. Launch on Pulse-Chain
- ii. Release of the Pulse-Chain to ERC-20 Bridge
- iii. Initial CEX Listings

4

Expansion

- i. Further CEX Listings
- ii. Listing on NowPayments.io
- iii. Listing on Shopping.io
- iv. Further Utility Release
